Petroleum Minister discusses cooperation with European Commissioner for Energy

Mohammed Emad • 05:10 22/04/2018 آخر تحديث: الأحد

.Minister of Petroleum and Mineral Resources Tareq Al-Mulla received the European Commissioner for Energy and Climate, Miguel Arias Canete on Sunday

.Al Mulla seeks to support the dialogue between the European and Egyptian sides on strategic cooperation in the field of energy

.The Egyptian minister met Canete last year in the Belgian capital Brussels

.Al Mulla pointed out that the visit of Canete comes within the framework of the ongoing dialogue between Egypt and the EU

.The visit aims at boosting cooperation in the field of energy, which is the most important pillar of Egypt's economic development," Al Mulla said"

.He stressed that the EU is a key partner of Egypt in many fields, and the petroleum sector in particular

to stimulate the energy sector which aims to achieve sustainable development

Italy's oil and gas giant Eni and Algeria's state Tuesday inked a raft of accords including in the sector as the company moves to extend its alliance, Eni said.

"The renewed collaboration between our companies, enshrined in today's agreements, allows Eni to make a further important step forward in a key country like Algeria and to consolidate further our strategic partnership with Sonatrach," said Eni's chief executive officer Claudio Descalzi.

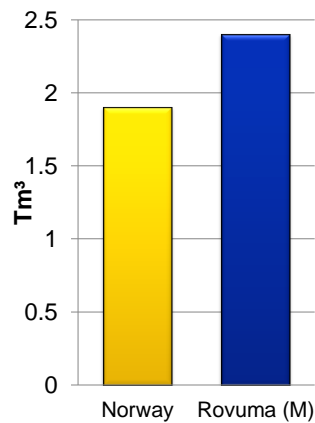

The forthcoming construction of a renewable energy laboratory and of a photovoltaic plant at the Bir Reban North production site is

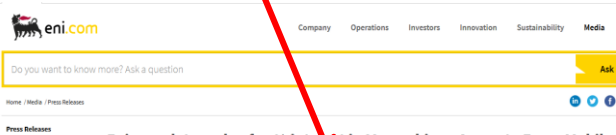

another step in Eni's decarbonisation process, Descalzi said.

"This process includes the development of green businesses through increasing commitment to renewable energy sources and to scientific and technological research," he said.

IL CEO DESCALZI
 «Abbiamo bisogno di investire di più perché l'Algeria ha ancora molto gas. L'offshore è molto interessante qui, stiamo lavorando su questo»

San Donato Milanese (Milan), 13 December 2017 – Eni has completed today the sale of a 25 percent indirect interest in the natural gas-rich Area 4 of the Rovuma Basin to ExxonMobil Development Africa B.V. ("ExxonMobil"). The terms of the sale, agreed in March 2017, include a payment of \$2.8 billion subject to a contractual adjustment until the date of closing. Eni East Africa, to be renamed Mozambique Rovuma Venture, which owns 70 percent of the Area 4 concession, is now co-owned by Eni (35.7 percent), ExxonMobil (35.7 percent) and CNPC (28.6 percent). The remaining interests in Area 4 are held by Empresa Nacional de Hidrocarbonetos E.P. (ENH, 10 percent), Kogas (10 percent) and Galp Energia (10 percent).

Poland's PGNiG inks 5-year deal with Centrica to buy US LNG

Poland's state-owned gas company PGNiG has signed a five-year contract with British utility Centrica to buy liquefied natural gas (LNG) sourced from Cheniere's Sabine Pass liquefaction plant in the US. The LNG will be delivered on a DES (delivered ex-ship) basis and the supplies will start in 2018.

U.N. shipping agency reaches deal to cut CO₂ emissions

Jonathan Saul, Nina Chestney

4 MIN READ

LONDON (Reuters) - The United Nations shipping agency reached an agreement on Friday to cut carbon emissions, following years of slow progress.

Shipping: 2.2% of CO₂ emissions = Germany

- 50 % by 2050 compared with 2008 levels
- EU asked 70 to 100%
- A final IMO plan is not expected until 2023
- the initial strategy would not be legally binding for member states
- Revision in 2028

Maritime and aviation are not subject to 2015 Paris Agreement

CONSEIL

DIRECTIVE DU CONSEIL
du 13 février 1975
concernant la limitation de l'utilisation de gaz naturel dans les centrales électriques
(75/404/CEE)

LE CONSEIL DES COMMUNAUTÉS EUROPÉENNES,
vu le traité instituant la Communauté économique européenne, et notamment son article 103,

certains cas l'utilisati
centrales électriques;

considérant que le gaz naturel constitue l'une de ces sources d'énergie communautaires, mais que les quantités disponibles en sont limitées ;

considérant qu'il convient de réserver le gaz naturel en premier lieu aux applications qui permettent la meilleure valorisation de ce gaz ;

CONSEIL

DIRECTIVE DU CONSEIL
du 18 mars 1991
abrogeant la directive 75/404/CEE concernant la limitation de l'utilisation de gaz naturel dans les centrales électriques
(91/148/CEE)

LE CONSEIL DES COMMUNAUTÉS EUROPÉENNES,
vu le traité instituant la Communauté économique européenne, et notamment son article 103 paragraphe 4,
vu la proposition de la Commission (1),
vu l'avis du Parlement européen (2),

considérant que la directive 75/404/CEE (3) a été adoptée à une époque où les réserves en gaz naturel étaient considérées comme d'un niveau insuffisant au regard de la sécurité d'approvisionnement de cette source d'énergie ;
considérant que cette situation a évolué et que, compte tenu des développements qui prévalent désormais sur le marché du gaz, il n'y a pas lieu de maintenir la limitation établie par la directive 75/404/CEE,

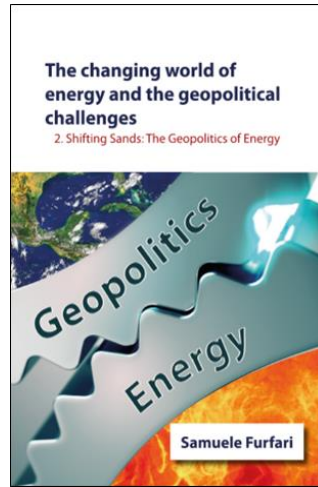

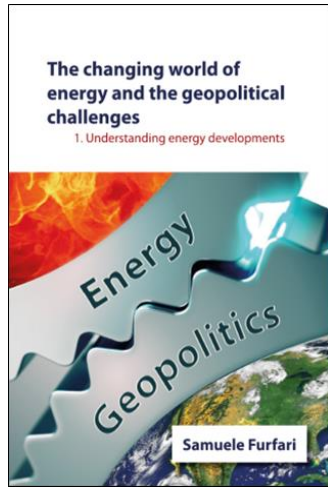

A ARRÊTÉ LA PRÉSENTE DIRECTIVE :

Article premier

La directive 75/404/CEE est abrogée.
